ABSTRACT:

PURPOSE: To prevent the detachment of a filter frame during washing or rinsing in the waste thread gathering device of a washing machine for gathering waste thread floating in water flow at the time of the washing and the rinsing.

CONSTITUTION: A first recessed part 2 formed on the side face inner wall of a washing tank 1 is covered with a water supply port filter 3, a second recessed part 5 is formed on the water supply port filter 3, the filter frame 14 provided with a filter 10 is freely rotatably and pivotally supported to a filter cover 7 and the filter cover 7 is mounted so as to cover the second recessed part 5. For the filter frame 14, pins 15 are projectingly

provided on  
both sides of a rotary shaft 12 and one of the pins 15 is abutted  
onto the  
inner surface of the filter cover 7 correspondingly to the rotation  
of the  
filter frame 14.

ABSTRACTED-PUB-NO: KR2004006233A

BASIC-ABSTRACT:

NOVELTY - A mounting device of a filter assembly for a drying machine is provided to reduce working hours by assembling a filter supporter and a filter cover easily with automatically integrating an assembling hole of an assembling boss and an assembling hole of a fixing protrusion in lifting the end of the assembling boss on a guide rib.

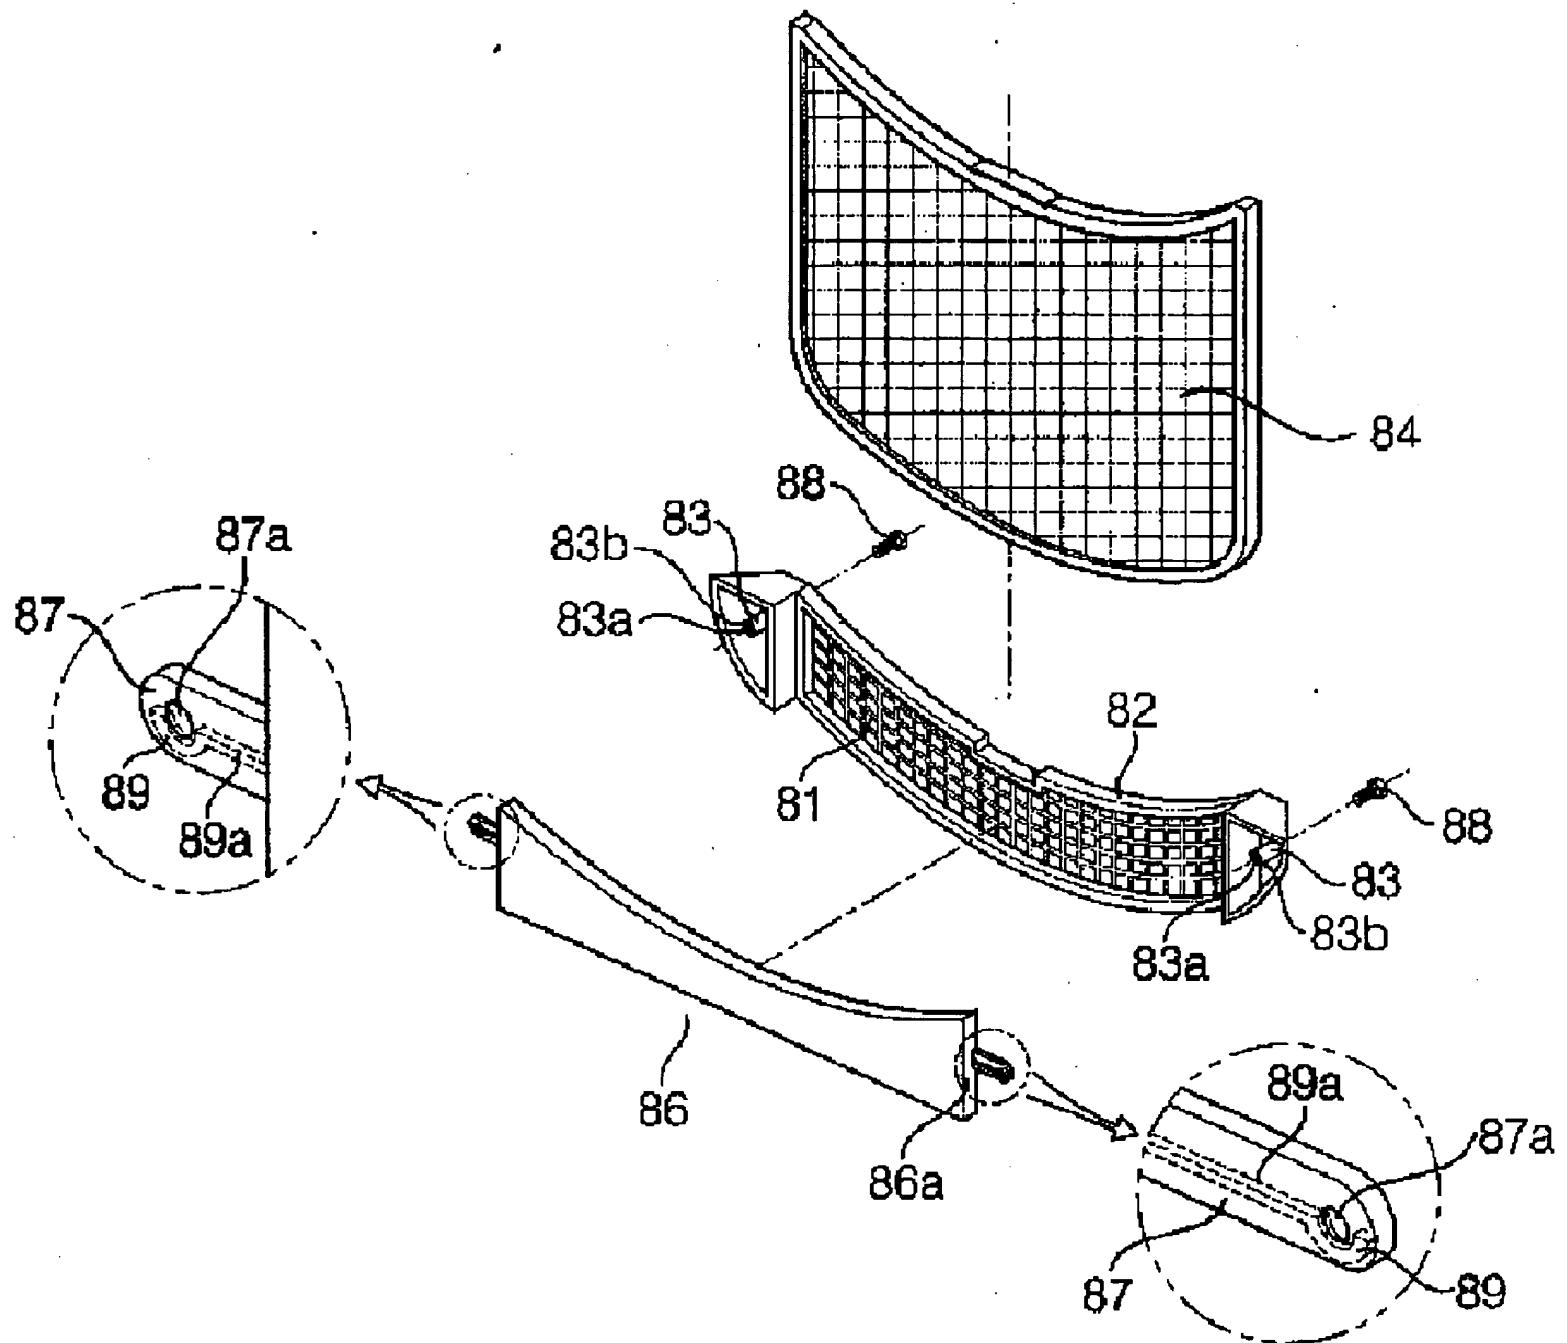

DETAILED DESCRIPTION - A filter assembly comprises a filter cover(82) having air suction holes sucking air drying the laundry; a filter(84) purifying air from the air suction holes; and a filter supporter(86) fixed to the filter cover by an assembling member to insert the filter. A filter assembly mounting device of a drying machine includes an assembling boss(83) protruded at both sides of the air suction holes and composed of an assembling hole(83a), a fixing protrusion(87) protruded at both sides of the filter supporter and composed of an assembling hole corresponding to the assembling hole of the assembling boss, and a guide rib(89) putting the end of the assembling boss thereon to integrate the assembling hole of the assembling boss with the assembling hole of the fixing protrusion in assembling the filter cover with the filter supporter.
